

STM32 Speed Radar

Arda Öztürk

Introduction and Applications

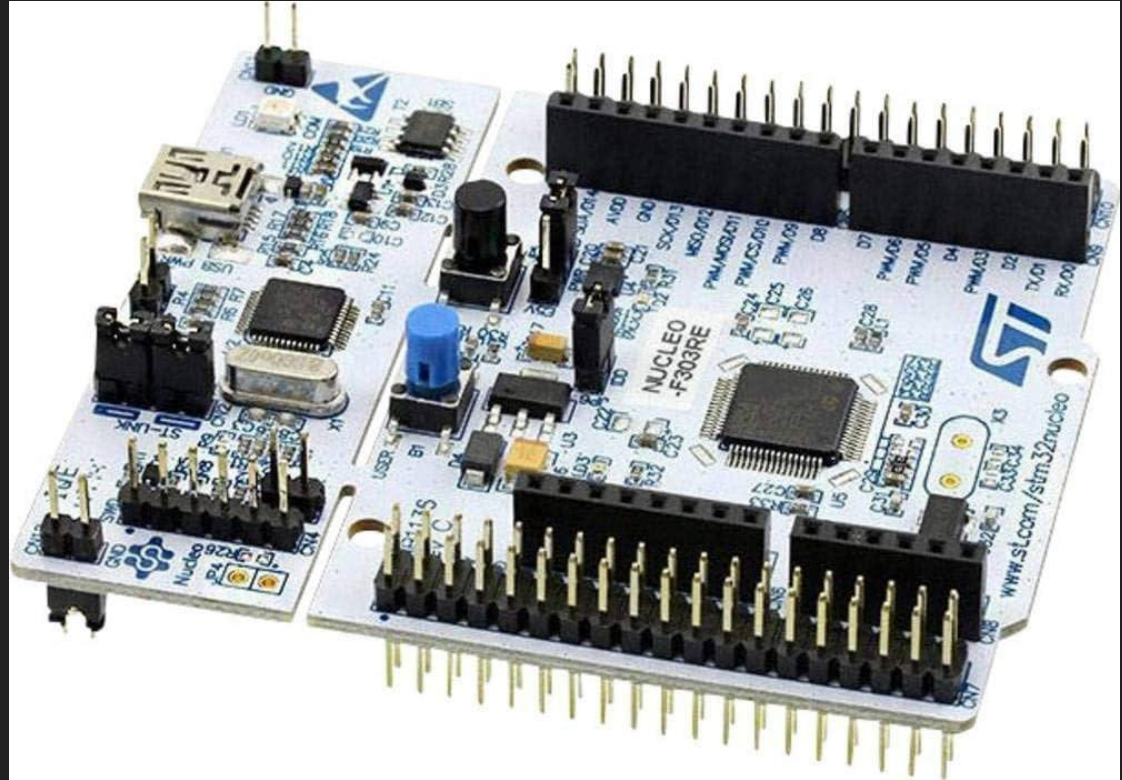

Traffic Management

Industrial Automation, Robotics and Logistics

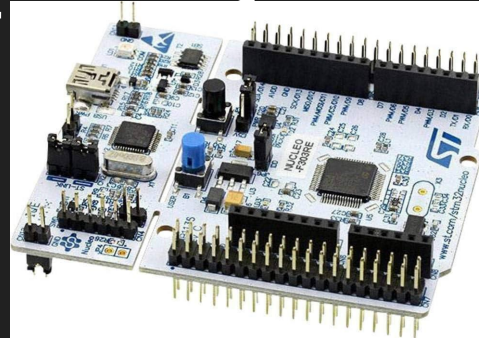

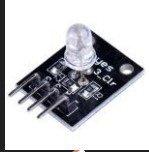

Microcontroller

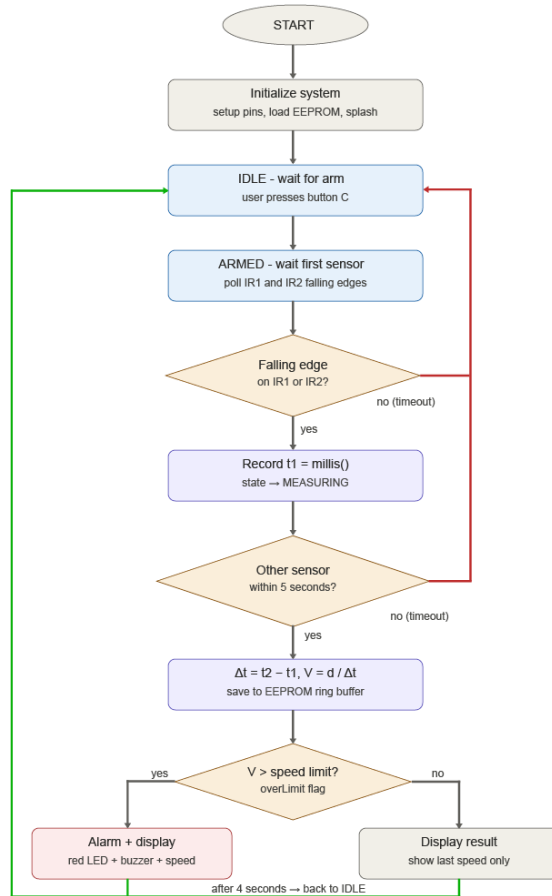

- **Cost-Effectiveness:** Significantly cheaper than using a full computer system.
- **Energy Efficiency:** Very little power consumption, ideal for battery-operated devices.
- **Real-Time Processing:** Response to external events are almost instantaneously.
- **Compact Size:** All-in-one design allows for the creation of small and portable devices.
